

SUPPLEMENT

Supplementary Table 1. US Patterns of Subcategorized Intermediate Suspicion Nodules by Modified K-TIRADS 2

Category	US Pattern
4 Intermediate suspicion	1) Solid hypoechoic nodule without any of 3 suspicious US features* or 2) Partially cystic or isoechoic and hyperechoic nodule with any of 3 suspicious US features*
4B	1) Solid hypoechoic nodule with marked hypoechoogenicity or macrocalcification [†] 2) Partially cystic or isoechoic and hyperechoic nodule with 2 or 3 suspicious US features*
4A	1) Solid mildly hypoechoic nodule without macrocalcification [†] 2) Partially cystic or isoechoic and hyperechoic nodule with 1 suspicious US feature*

*Microcalcification, nonparallel orientation (taller-than-wide), spiculated/microlobulated (irregular) margin, [†]Includes isolated macrocalcifications. K-TIRADS = Korean Thyroid Imaging Reporting and Data System, US = ultrasonography
