

(A)

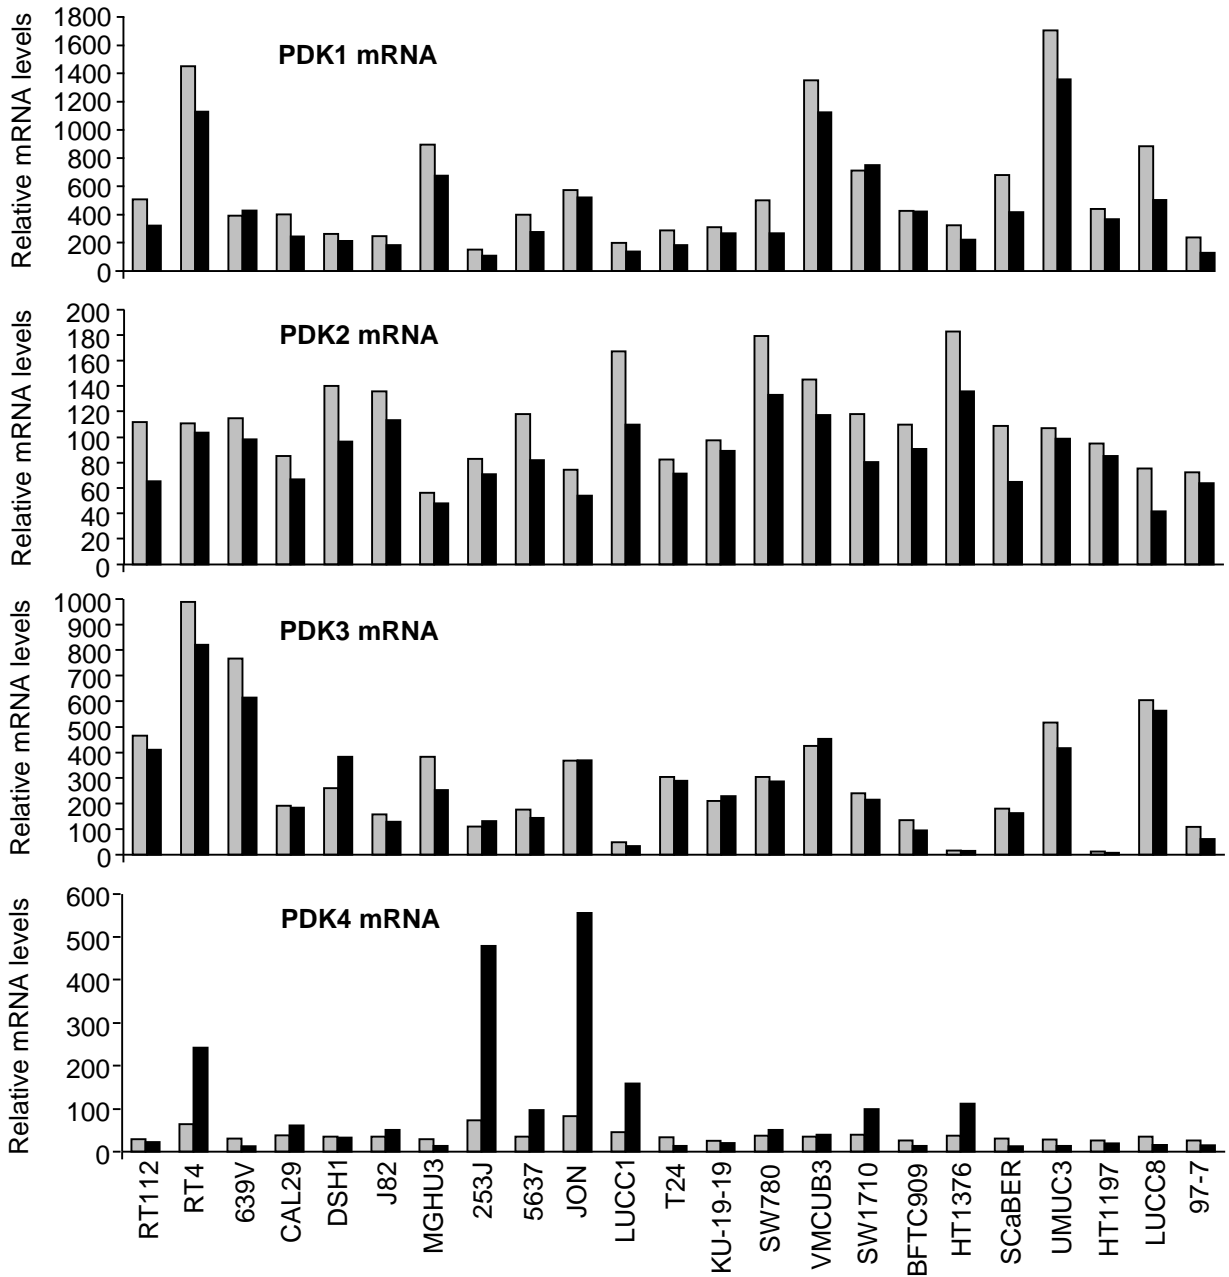

Figure S4. Cell line mRNA expression of PDKs.

A, mRNA levels of PDKs 1-4 in the indicated bladder cancer cell lines, as determined by microarray gene expression analyses. Results are shown for two different mRNA probe sets for each PDK; probe set identifiers are listed in the Methods. Grey bar: probe 1, black bar: probe 2. Cell lines are ordered from left to right on the basis of cellular lactate release (low to high rate of lactate release).
