

Supplemental Figure 1. A. Image of chyle from an *iLEC^{Kras}* mouse. **B.** Survival curves for *iLEC^{Ctrl}* mice (n = 23) and *iLEC^{Kras}* mice (n = 13). Mice were fed tamoxifen (2 μ l of 25 mg/ml solution) from P0-P2. The median survival of *iLEC^{Kras}* mice was 26 days. $P < 0.0001$; log-rank (Mantel-Cox) test.
