

# Trauma Video Review Utilization Survey

We are conducting an electronic survey investigating the use of trauma video review (TVR) technology at trauma centers across the United States. TVR is any recording technology that is used to capture and record trauma resuscitations. The purpose of this study is to quantify centers that have active TVR programs, have had one in the past, or plan to develop a program in the future.

Completion of this survey constitutes consent to be involved in this study.
