

Figure S1. Transfection efficiency measured via reverse transcription-quantitative PCR. ^{ns}P>0.05; ^{**}P<0.001, ^{****}P<0.0001 vs. NC group; ^{###}P<0.001, ^{####}P<0.0001 vs. respective NC. NC, negative control; mimics-NC, NC of miR-29a mimics; mimics, miR-29a mimics; inhibitor-NC, NC of miR-29a inhibitor; inhibitor, miR-29a inhibitor.; miR, microRNA; ns, not significant.
