

Supplementary Figure for

Vaccine nanodiscs plus polyI:CLC elicit robust CD8⁺ T cell responses in mice and non-human primates.

Supplementary Figure 1. CM9-specific memory CD8⁺ T cell responses in NHPs. *Mamu-A*01* rhesus macaques were immunized as described in **Figure 7A**. Shown are CM9-specific memory CD8⁺ T cell responses in BAL tissues on week -1, 8, 24, and 26, as measured by intracellular cytokine staining.
