eFigure 1. Clustering Before and After Batch Correction
eFigure 2. Tumor Location

This supplementary material has been provided by the authors to give readers additional information about their work.
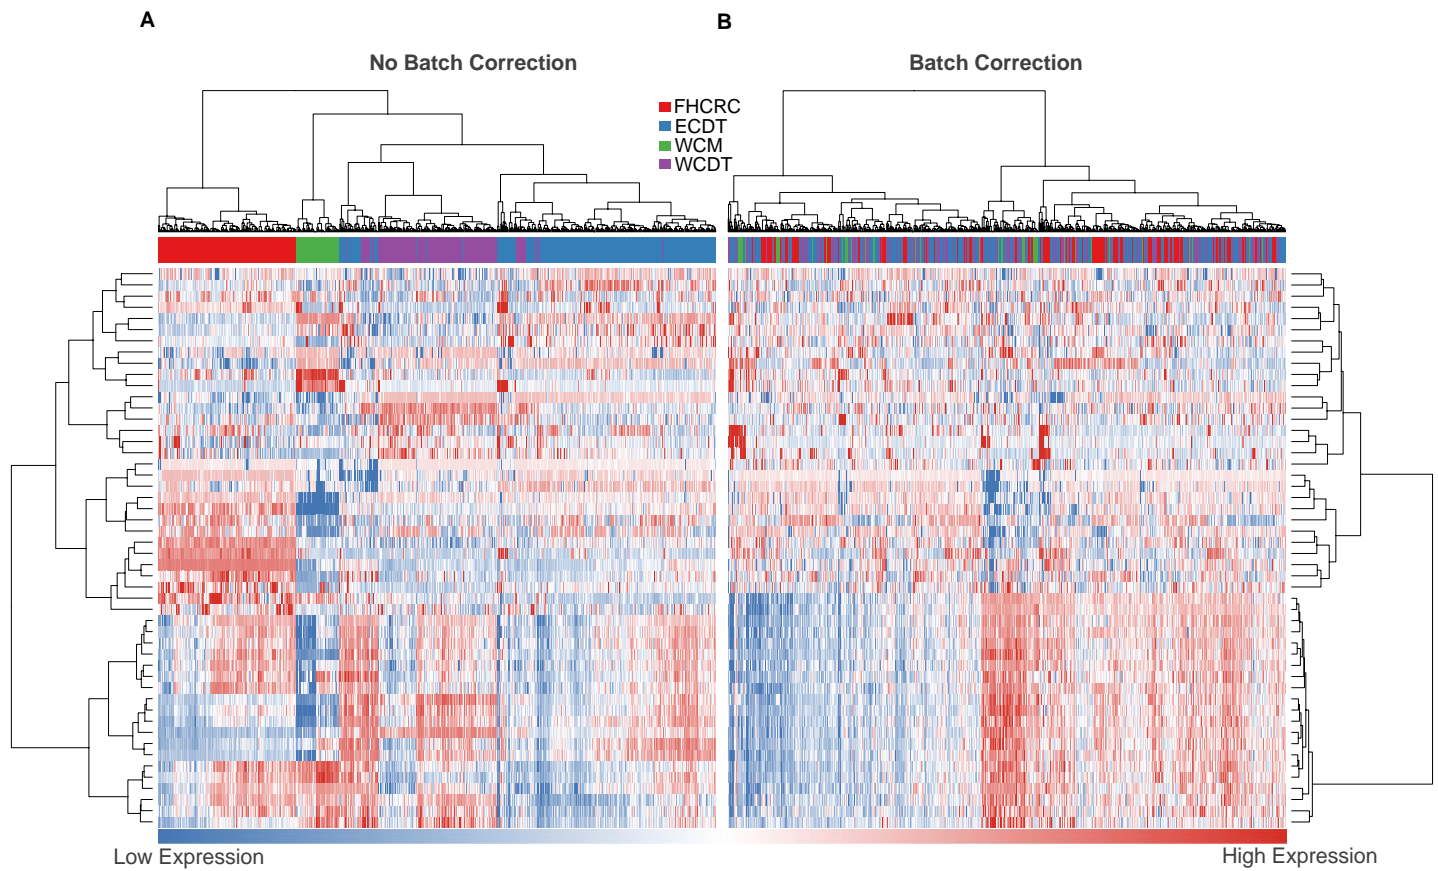

eFigure 1: Clustering before and after batch correction. Heatmaps depicting clustering of patient samples before (**A**) and after (**B**) batch correction.

eFigure 2: Tumor location. Luminal-basal score of samples stratified by the biopsy location. A significant global difference in luminal-basal score based on biopsy site was identified (Kruskal-Wallis p-value = 0.002) with further BH-adjusted Wilcox signed rank testing p-values documented above.
