

ESM Figure 1

ESM Figure 1. Body composition and hyperinsulinaemic–euglycaemic clamp studies in mice fed either *ad libitum* chow [white], *ad libitum* HFD [black], or HFD-restricted [hatched] for 6 weeks. **a** Fat mass and **(b)** glucose infusion rate during euglycemic hyperinsulinemic clamp. (n=5/group) (* p<0.05 SR vs. PF and VEH)
