

## **Additional File 5**

**Supplementary Table 2.** Correlations between items of the social function subscale.

	Item 20	Item 33	Item 51
Item 20	1	0.62	0.24
Item 33	0.74	1	0.22
Item 51	0.40	0.39	1

Lower-triangular part: zero order correlations; upper-triangular part: partial correlations controlling for QoL subscale score; all Pearson's coefficients are statistically significant at  $p < 0.001$ .
