Fragmentation diagram showing peptide sequence: - S Q D Q W S V Y I R. The diagram illustrates the formation of b and y ions from the sequence. Blue lines indicate b-ion formation (D, Q, W, S, V) and red lines indicate y-ion formation (D, Q). The y-ion is labeled 'y' in red. The de and ph modifications are indicated above the Q and Y residues, respectively.

Fragmentation diagram showing the sequence H T L G D S D N E S. The sequence is broken into fragments: H, T, L, G, D, S, D, N, E, S. The fragments T, L, G, D, S, D, N, E are connected by blue lines, indicating fragmentation sites. The fragment S is shown as a separate peak. The label 'ph' is positioned above the S fragment. The label 'b' is positioned below the T, L, G, D, S, D, N, E fragments. The label 'b*' is positioned below the S, D, N, E fragments.

Fragmentation diagram showing peptide sequence: - A L Q K R H D D F E. The sequence is broken into fragments: A, L, Q, N, T, Y, T, N, A, D. The fragment QN is labeled with b² (blue), and the fragment Y is labeled with y (red). The fragment Y is also labeled with b (blue). The fragment Y is also labeled with y (red). The fragment Y is also labeled with y (red). The fragment Y is also labeled with y (red).

Fragmentation diagram showing the sequence of amino acids: Q, T, M, A, E, F, S, Q, K, R. The diagram indicates the presence of a **y** ion (red) and a **b** ion (blue) at the T position, and a **y** ion (red) at the R position. The sequence is shown as:

- Q T M A E F S Q K R

Fragmentation labels: **y** (red) above M, **ox** (red) above M, **b** (blue) below T, **y** (red) above R.

Diagram illustrating the fragmentation pattern of the peptide sequence:

- D S Y M D T L P S S
 L T K -

The diagram shows the peptide sequence with fragmentation lines indicating the formation of b and y ions. The b ions are labeled in blue and the y ions are labeled in red. The fragmentation lines are shown as brackets above and below the sequence.

Fragmentation diagram showing the sequence of amino acids: E, D, T, T, E, V, P, S, S, T, V. The diagram includes labels for the amino acids and their corresponding fragmentation types (y, y-HO) indicated by red boxes and lines.

Fragmentation types (y, y-HO) are indicated by red boxes and lines above the amino acid sequence.

Fragmentation types (y, y-HO) are indicated by red boxes and lines below the amino acid sequence.

Fragmentation types (y, y-HO) are indicated by red boxes and lines below the amino acid sequence.
