

Supplementary Table. The overall Incidence of peripheral arterial disease (per 1,000 person-years), estimated hazard ratios in patients with systemic sclerosis compared to those without Systemic sclerosis

Variables	Systemic sclerosis	
	No(N=4396)	Yes(N=1099)
Person-years	24802	4212
Event, n	66	257
Rate	2.66	61.0
Crude HR (95% CI)	1(Reference)	20.7(15.8, 27.1)***
Adjusted HR (95% CI) <sup>a</sup>	1(Reference)	22.8(17.0, 30.7)***

Adjusted HR<sup>†</sup> : multivariable analysis including age, gender, and comorbidities of diabetes, hypertension, hyperlipidemia, COPD, heart failure, CAD, stroke, and asthma
