Supplementary Figure 8 (related to Figure 5) Stage and tissue distribution of ILC2 sub-clusters

(a) Bar graphs show proportions of each ILC2 sub-cluster in different stages. Colors indicate different cell populations. **(b)** UMAP visualization of cells in Pre-ILC2 cluster are further separated into Pre-ILC2a and Pre-ILC2b subgroups by UMAP analysis (left panel). Stage (middle panel) and site (right panel) information of Pre-ILC2 subgroups is indicated by colors. **(c)** Violin plots show the expression level of indicated genes in Pre-ILC2a and Pre-ILC2b subgroups. Colors indicate subgroups. **(d)** Pie charts show the tissue distribution of each ILC2 sub-cluster. Colors indicate different cell populations.
