Tables S1, S2
Figures S1, S2, S3

Supplementary Tables and Figures

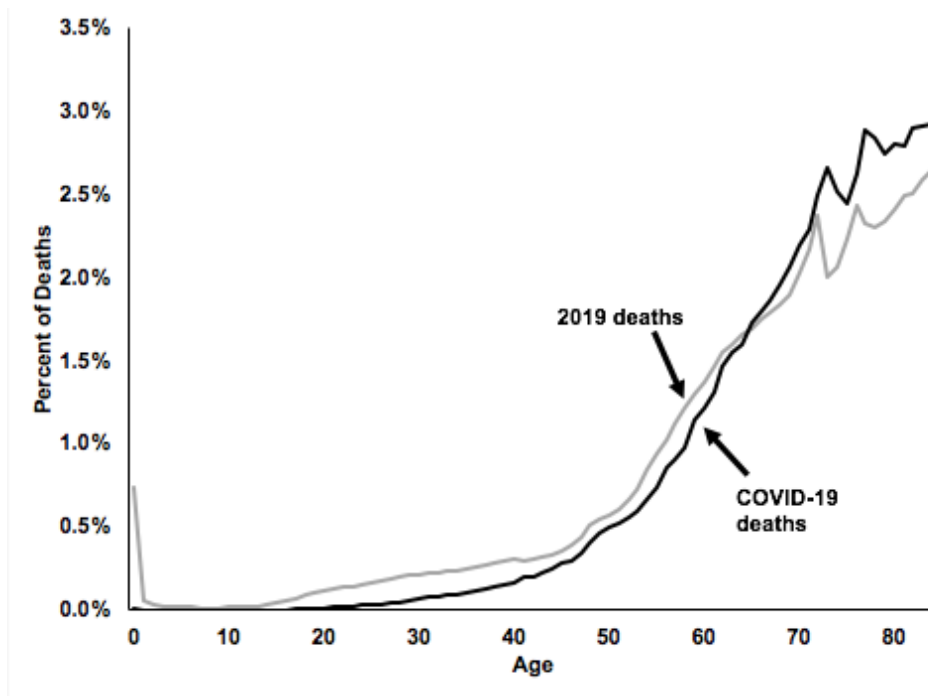

Figure S1: Percent of Deaths by Age, All Cause Deaths 2019 and COVID Deaths through 2/22/2021

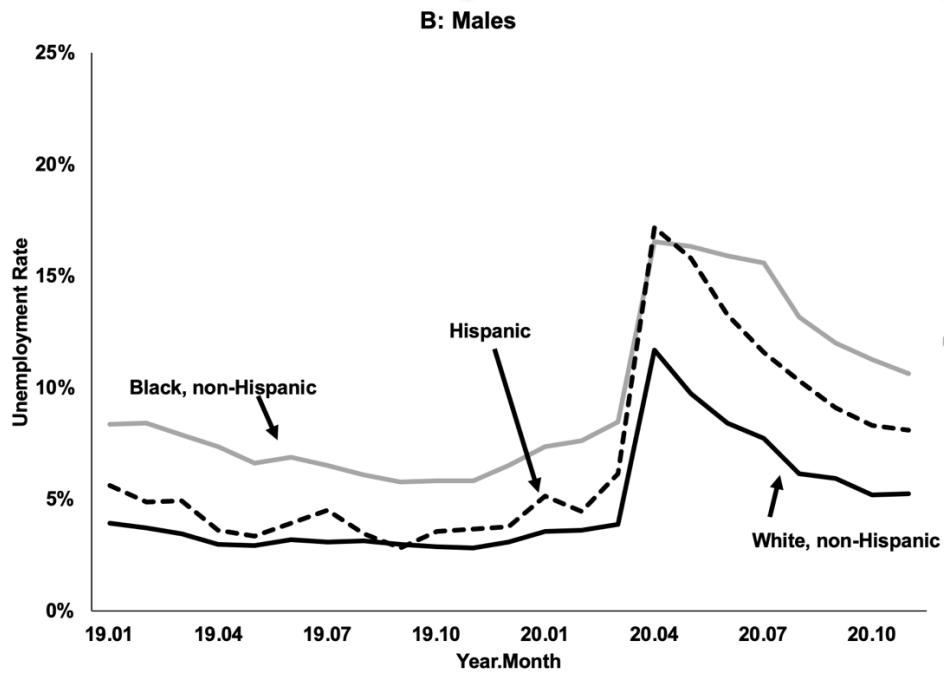

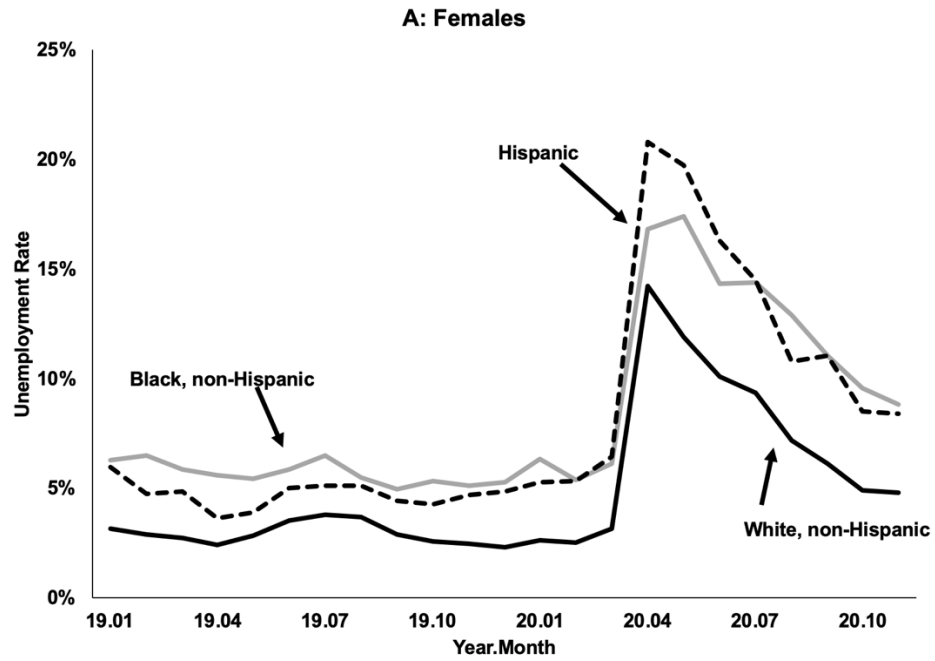

Figure S2: Unemployment Rates, 2019 and 2020, by Gender and Race/Ethnicity

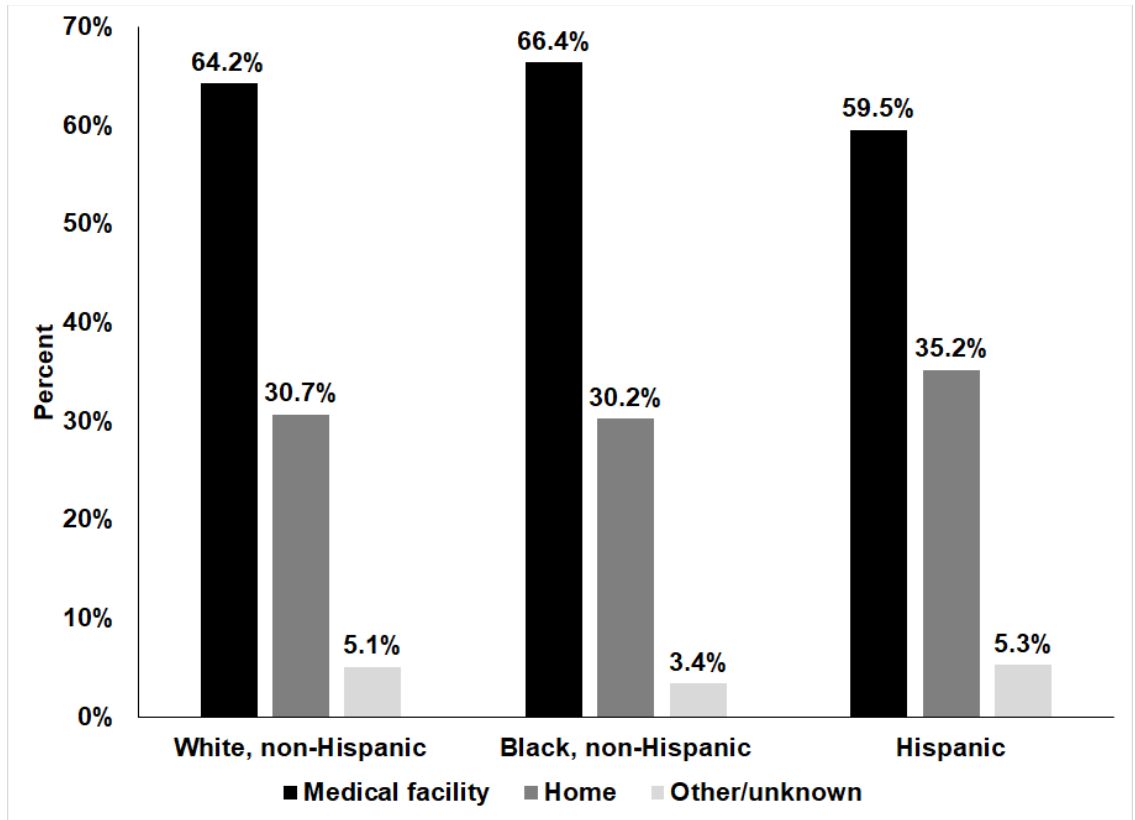

Figure S3: 2019 Place of Death for those 65+, by Race/Ethnicity

Table S1: Sensitivity of Excess Death Totals to Alternative Sets of Baseline Years

	2020 Excess Deaths				
	15-19	16-19	17-19	18-19	19
Not Age-Population Adjusted	543,711	523,207	507,189	499,217	473,354
under 65	123,786	120,127	120,392	122,952	121,505
65+	419,915	403,079	386,798	376,265	353,849
Age-Population Adjusted	405,234	406,916	413,591	429,129	427,074
under 65	119,036	117,004	118,515	121,915	121,047
65+	286,199	289,911	295,077	307,215	306,027

Table S2: Sensitivity of Life Years Lost Calculations to Other Assumptions

Group	Life years lost from all excess mortality in 2020 (in millions)		
	Table 2 results	Using LYL for median age in age bin	Using the simple average of LYL across ages in the age bin
All	6.03	5.98	6.00
Females	2.31	2.29	2.30
Males	3.71	3.69	3.70
White	2.93	2.90	2.91
Black/Hispanic	3.09	3.09	3.09
Non-Hisp. White females	1.19	1.17	1.18
Non-Hisp. White males	1.75	1.73	1.73
Non-Hisp. Black females	0.61	0.60	0.60
Non-Hisp. Black males	0.87	0.87	0.87
Hispanic females	0.52	0.52	0.52
Hispanic males	1.10	1.09	1.10
