

Table S2. Comparison of the prevalence of knee osteoarthritis between the stroke and no-stroke groups

Variable	Prevalence of knee osteoarthritis		p-value ^{a)}
	No-stroke group	Stroke group	
Total	1059 (19.8)	65 (21.0)	0.668
60–69 y	400 (14.5)	23 (14.9)	
70–79 y	511 (24.2)	29 (22.1)	
≥80 y	148 (31.9)	13 (38.4)	

Values are presented as number (%).

^{a)}Using the chi-square test.
