

Figure S2. The Cys1243Ser substitution has no effect $CdiA^{STEC4}$ growth inhibition activity.

Inhibitor cells expressing wild-type $CdiA^{STEC4}$ or the Cys1243Ser variant were co-cultured at a 1:1 ratio with *E. coli* CH7175 (*waa*⁺ Δ *wzb*) target cells on LB agar. The competitive index is the ratio of viable inhibitor to target cells after 3 h. Data are the average \pm SEM from four independent experiments.
