

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Targeted proteomics profiling of mitochondrial and metabolic proteins from WT, RC/RC, and RC/null mice and RC/RC and RC/null mice treated with mCAT. Protein abundance and the magnitude of effect due to the PKD1 gene mutation, mCAT treatment, and PKD1 dose. Only the numbers with significant changes are shown. Positive denotes increases in abundance (in %) and negative denotes decreases in abundance (in %).

File name: Supplementary Data 2

Description: Source data for Figures 1-9.
