

Reproducibility of the clustering approach

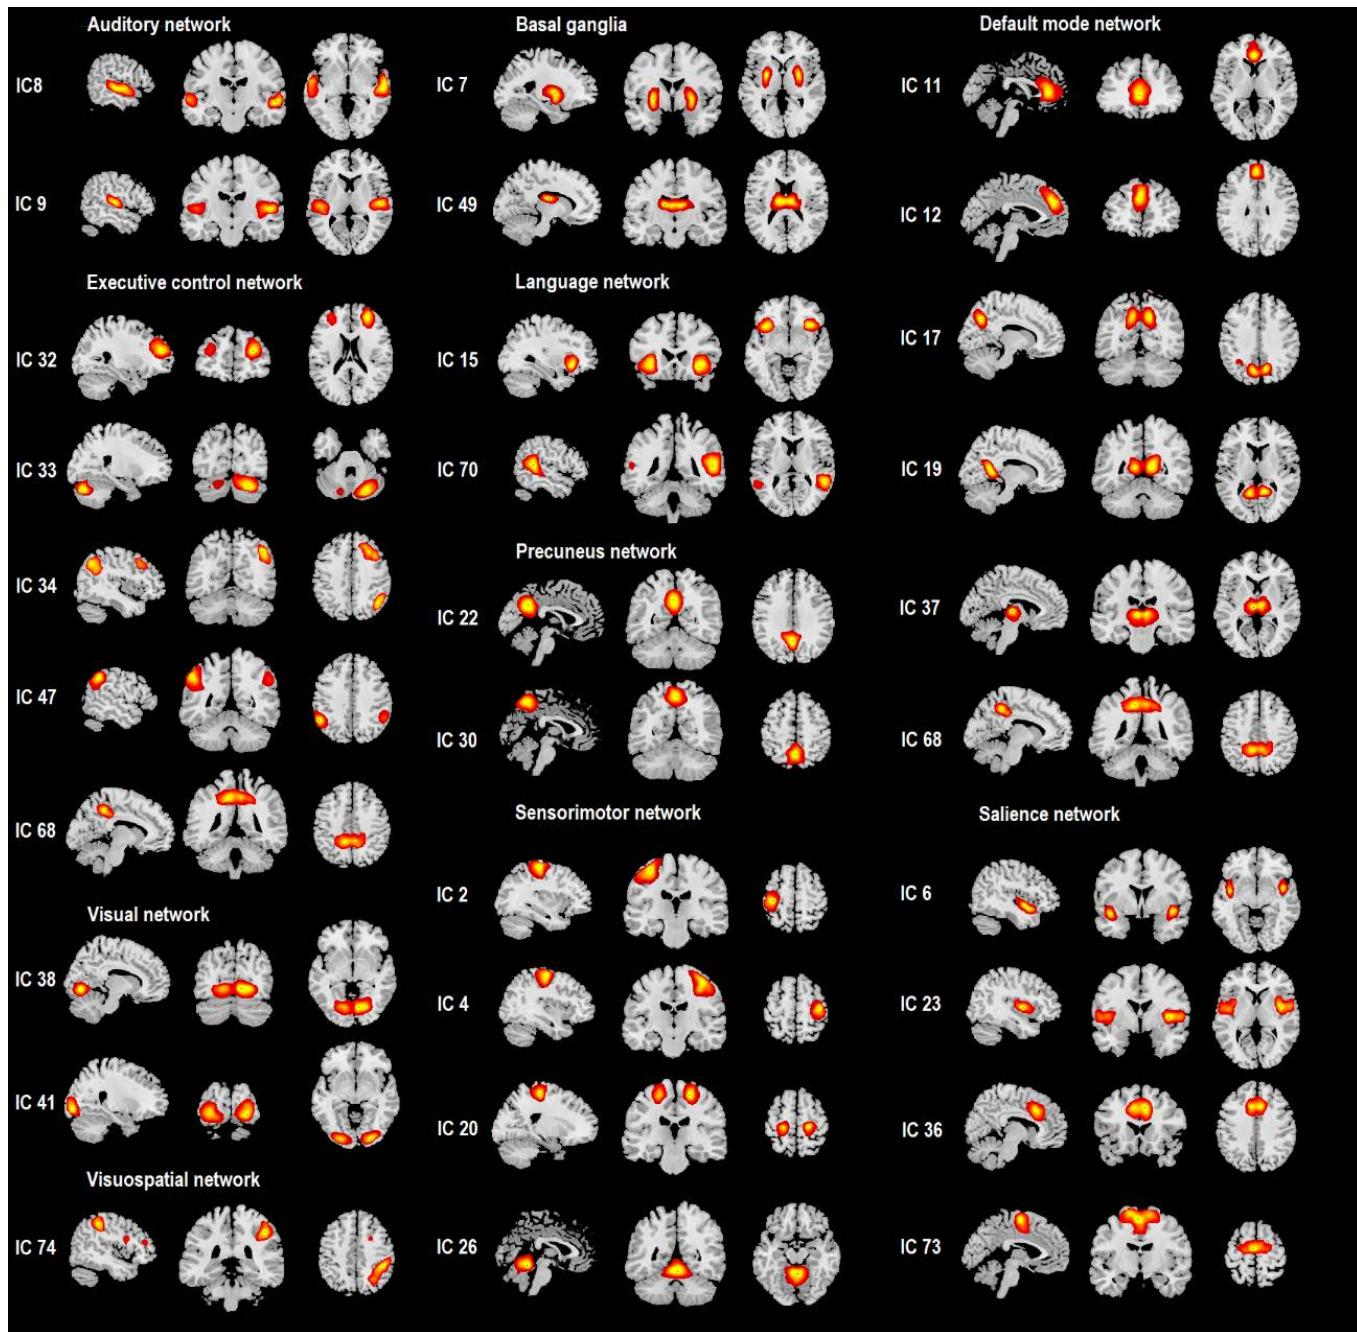

Supplementary Figure 1 Reproducibility of the estimated dynamic FNC states of the 2- and 4-states solutions

Cluster centroids for split half and random resamples for the 2-states cluster solution ($k = 2$) and the 4-states solution ($k = 4$). Subjects were randomly resampled in 5 sets of 50, 55, 60, 65 and 70 and 2 more sets of 35 subjects each (split-half samples). K-means clustering algorithm was applied as described in the methods section for the whole sample.

Independent component maps from group-ICA

Supplementary Figure 2 Independent component maps

Independent components (IC) maps grouped into 10 networks as in the Findlab atlas (Shirer et al., 2012). Maps were thresholded at $t = 4$.

Supplementary Table 1 Peak coordinates of the independent components extracted from ICA

| Network | t-max stat | Brodmann/cerebellar area | MNI coordinates (x y z) |
|--|------------|--------------------------|-------------------------|
| Auditory network (AUD) | | | |
| IC 8 right superior temporal | 14.383 | 22 | 59 -18 -5 |
| IC 9 right planum temporale | 16.884 | 41 | 54 -17 5 |
| Basal ganglia network (BG) | | | |
| IC 7 left putamen | 20.685 | - | -26 0 0 |
| IC 49 left thalamus | 18.406 | - | -12 -14 15 |
| Default mode network (DMN) | | | |
| IC 11 right anterior cingulate | 22.272 | 24 | 0 38 3 |
| IC 12 left paracingulate | 20.785 | 9 | -2 47 29 |
| IC 17 right precuneus | 27.295 | 7 | 12 -65 36 |
| IC 19 right precuneus | 25.253 | 23 | 12 -51 8 |
| IC 37 left thalamus | 18.400 | - | -5 -20 3 |
| IC 68 left precuneus | 14.670 | 31 | -8 -44 44 |
| Executive control network (ECN) | | | |
| IC 32 right frontal pole | 16.641 | 10 | 29 50 18 |
| IC 33 right cerebellum | 19.070 | Crus I | 24 -80 -33 |
| IC 34 right angular gyrus | 18.134 | 39 | 44 -63 41 |
| IC 47 left angular | 19.344 | 39 | -53 -51 39 |
| IC 94 right lateral occipital | 12.544 | 39 | 38 -62 42 |
| Language network (LANG) | | | |
| IC 15 right orbitofrontal | 16.682 | 47 | 33 23 -9 |
| IC 70 right middle temporal | 18.945 | 22 | 54 -44 9 |
| Precuneus network (PC) | | | |
| IC 22 right precuneus | 23.355 | 31 | 0 -56 32 |
| IC 30 right precuneus | 18.602 | 7 | 2 -59 53 |
| Salience network (SN) | | | |
| IC 6 right insula | 18.209 | 13 | 45 2 -9 |
| IC 23 right insula | 13.916 | 13 | 41 0 2 |
| IC 36 right paracingulate | 13.073 | 8 | 8 20 38 |
| IC 73 left supplementary motor area | 22.151 | 6 | -2 -9 62 |
| Sensorimotor network (SM) | | | |
| IC 2 left precentral | 18.730 | 4 | -35 -23 59 |
| IC 4 right precentral | 20.844 | 6 | 39 -17 59 |
| IC 20 right precentral | 19.336 | 4 | 21 -24 60 |
| IC 26 right cerebellum | 22.287 | Vermis IX | 2 -51 -17 |
| Visual network (VIS) | | | |
| IC 38 right lingual | 18.849 | 18 | 11 -75 -6 |
| IC 41 right occipital | 18.778 | 18 | 26 -92 -8 |
| Visuospatial network (VSP) | | | |
| IC 74 right supramarginal | 17.612 | 40 | 47 -36 45 |

IC, independent component.
