

Figure S2. Quantification of *in vitro*- generated spermatocytes.

(A). Quantification of leptotene, zygotene, early pachytene and meiotic m-phase spermatocytes per microscopy slide for each time point. Data are presented as the mean \pm SEM, n=3.

(B). Quantification of pachytene spermatocytes in Group A and Group B per microscopy slide for each time point. Data are presented as the mean \pm SEM, n=3.
