Supplementary table legends

Supplementary Table S1. Evaluation of histopathological parameters to renal damage and maladaptive repair.

The pathological parameters of (a) acute tubular injury and (b) renal maladaptive repair were set in the table. The each histological parameter was graded from 0 to 3 according to the distribution of lesions: 0=none; 1=<25%; 2=25–50%; 3=>50%. The average values of all parameters in the 10 random views of each kidney slice was counted for analysis and comparison.
