

**Plant Communications, Volume 2**

**Supplemental information**

**The transcription factor MYB40 is a central regulator in arsenic resistance in *Arabidopsis***

**Yun Chen, Hong-Yang Wang, and Yi-Fang Chen**

**Supplemental Figure 1. The *myb40* Mutant was Generated by CRISPR/Cas9 Technology**  
**(A)** Diagram of *MYB40* showing two target sites (C1 and C2) for CRISPR/Cas9 technology. PAM motifs are marked with bold letters. The exons and introns of *MYB40* are indicated by gray boxes and black lines, respectively.  
**(B and D)** Mutation in the *MYB40* gene was evaluated by sequencing. The mutant sites in *MYB40* are indicated by red letters.

**Supplemental Table 1.** Primer sequences used in this study.

Primer Name	Primer Sequence (5'-3')	Vector Design
<b>For Cloning and Genotyping</b>		
MYB40-F	ATGGGGAGAAAACCGTGCTGTG	pCXS
