

Supplementary Figure.1

Supplementary Figure.1: MCC950 did not inhibit the activation of P65/NF- κ B pathway in IL-1 β -treated mouse chondrocytes. (a) Western blotting results of P65/NF- κ B pathway proteins. (b) Quantification analysis of P65/NF- κ B pathway proteins expression. Data are shown as the mean \pm SD. Significant differences between groups are indicated as # P <0.05 vs control group; * P <0.05 vs IL-1 β group.
