

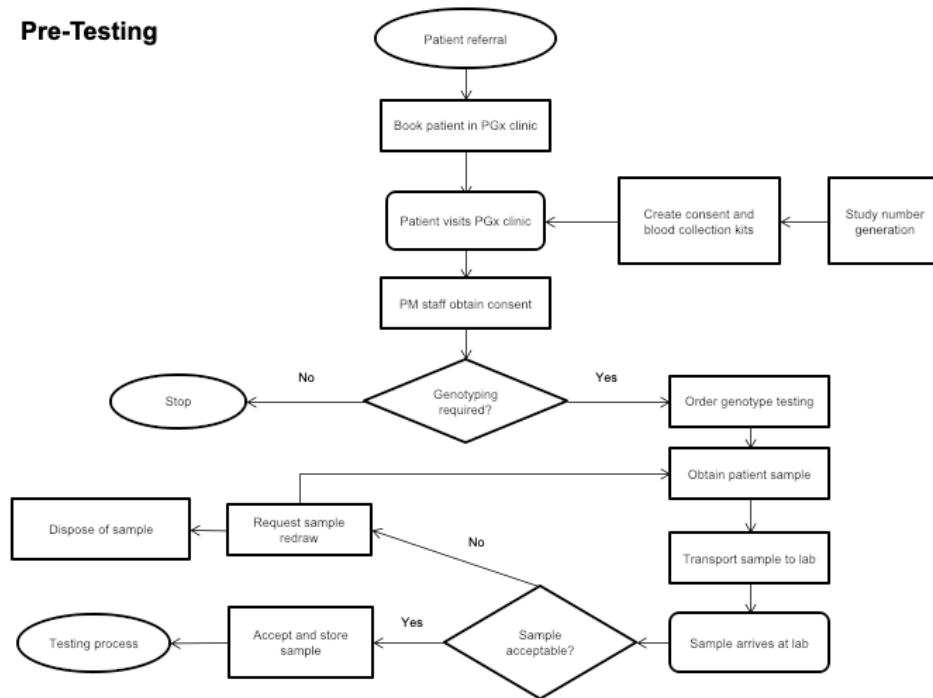

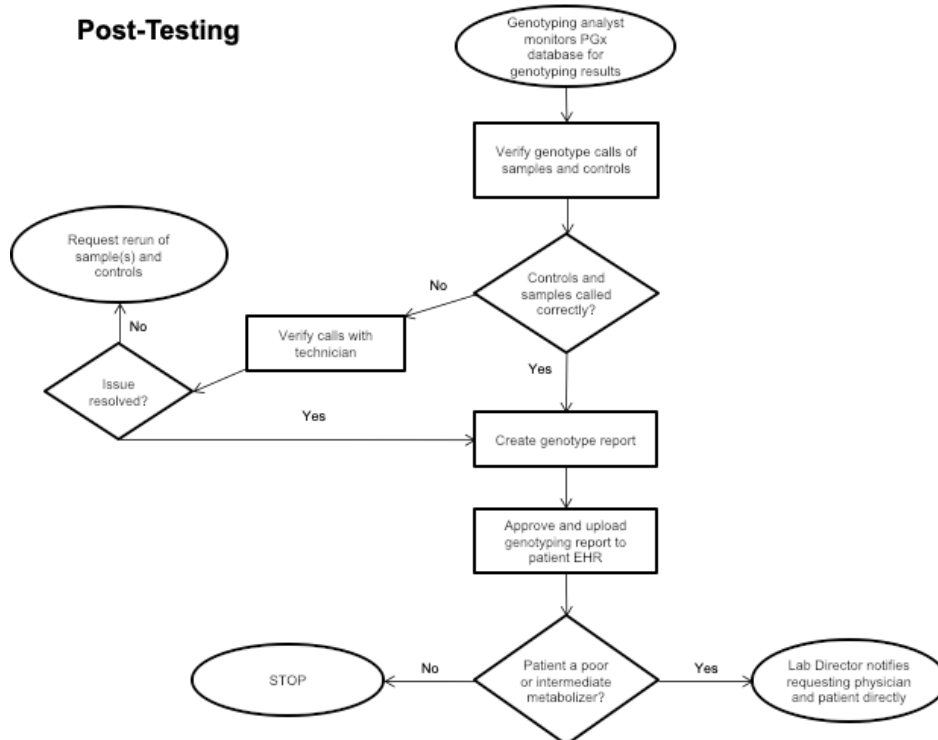

**Figure S1.** Workflow to review Canadian pharmacogenomics literature on stakeholder perspectives. Databases searched included, PubMed, Embase and Web of Science. Total number of articles included was 14 articles; after removing duplicates, removing not relevant, and including additional papers found.

## Pre-Testing

## Post-Testing

**Figure S2.** LHSC PGx pre-testing and post-testing workflow. Genotyping follows a standardized process. Each individual step has an accompanying individual standard operating procedure to ensure consistency and accountability.
