SUPPLEMENTAL MATERIAL

Supplemental Figure and Figure Legend

Figure I: Baseline cognitive performance for Crest-2 with risk-factor adjustment: Box-and-whisker plots showing the distribution of cognitive performance in the CREST- 2 value where scores are standardized using the general population values from the REGARDS population, and after adjustment for hypertension, diabetes, dyslipidemia and smoking. The box-and-whisker plot is drawn with the box showing the 25th and 75th percentiles, the line within the box the 50th percentile, the whiskers the 5th and 95% percentiles, and observations below the 5th percentile or above the 95th percentile.
