

Table S1. CCl₄ duration and dosage in protocols for liver fibrosis induction

	Liver fibrosis induction		Post-transplant maintenance		Final histologic evaluation
	CCl ₄ duration	CCl ₄ dose	CCl ₄ duration	CCl ₄ dose	
Moderate toxicity protocol	8 weeks	0.65 ml/kg	6 weeks	0.5 ml/kg	At 14 weeks
Intense toxicity protocol	10 weeks	0.75 ml/kg	4 weeks	0.5 ml/kg	At 14 weeks

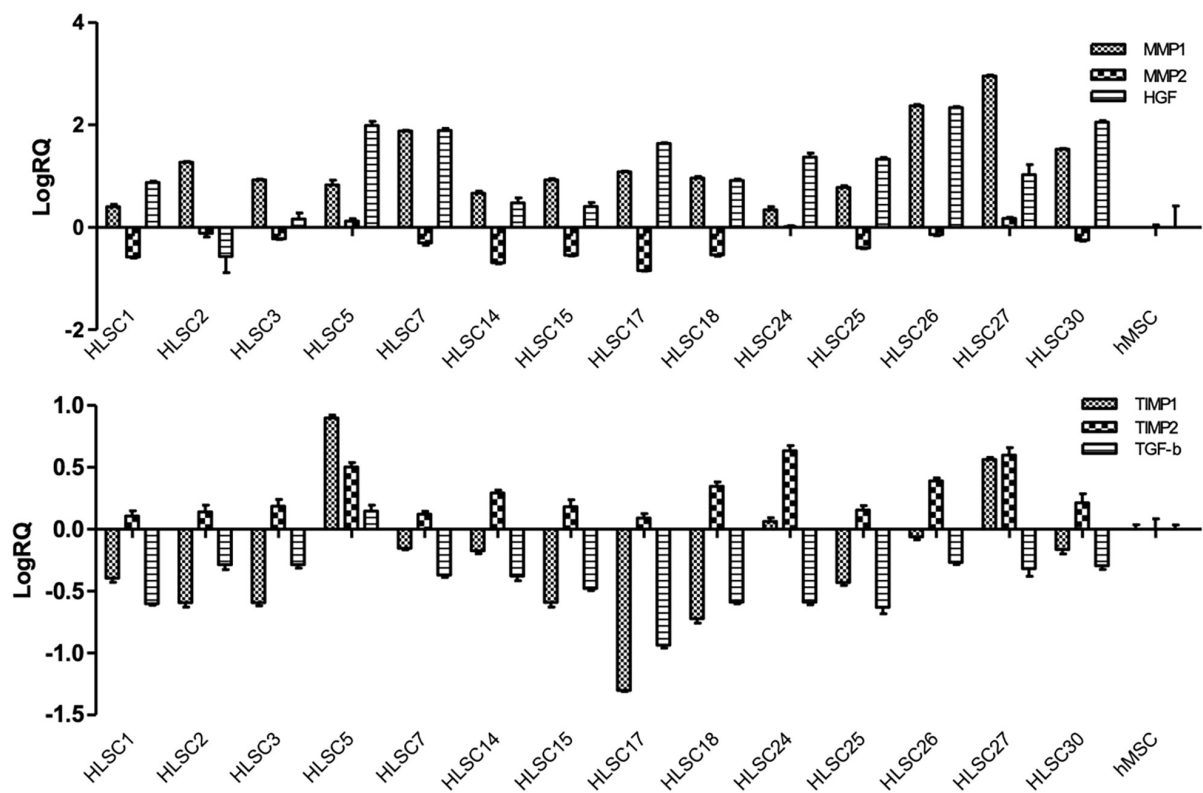

Fig. S1. Expression of ECM remodeling factors by HLSC strains. Results are expressed as relative values to expression of factors by human MSCs.
