

## Supplementary Figure 4

**Supplementary figure 4. Splenic pDCs from IRF8<sup>R294C</sup> mice are defective in upregulation of costimulatory molecules.** Quantitation of MFI of (A) CD40, (B) CD86 and (C) CD80 in splenic CD11c<sup>+</sup>SiglecH<sup>+</sup> pDCs from control or NDV infected IRF8<sup>WT</sup> and IRF8<sup>R294C</sup> mice as described in Figure 6. Data (A-C) shown are mean value with error bar representing + SEM and \*\*\* p < 0.001 (n = 6 mice per group).
