

Study title	Priority	Sponsor	Study type	Status	Finished?	Published
VEST: The UK Vedolizumab Real Life Experience Study in Inflammatory Bowel Disease (VEST)	1	NHS Foundation trust	Prospective observational cohort study	recruiting	No	-
Electrical Vagal Nerve Stimulation in Ulcerative Colitis (EVASION-UC)	1	Queen Mary University of London	Crossover RCT	recruiting	No	-
Investigation of the Faecal Loss of Vedolizumab and Its Role in Influencing Serum Drug Levels, Outcomes and Response in Ulcerative Colitis (FAVOUR)	1	Guy's and St Thomas' NHS Foundation Trust	Open label clinical trial	recruiting	No	-
Study of the Golimumab Exposure-Response Relationship Using Serum Trough Levels (GO-LEVEL)	1	Guy's and St Thomas' NHS Foundation Trust	Open label clinical trial	recruiting	No	-
Autologous Stem cell Transplantation In refractory Crohn's disease – Low Intensity Therapy Evaluation (ASTIClite)	1	Barts Health NHS Trust	RCT	recruiting	No	-
The PRognostic Effect of Environmental Factors in Crohn's and Colitis (PREdiCct)	2a, 10	University of Edinburgh	Prospective observational cohort study	recruiting	No	-
Faecal Calprotectin as a Potential Non-invasive Inflammatory Marker in Pregnancy and Inflammatory Bowel Disease (PREGCAL)	2b	The Royal Wolverhampton Hospitals NHS	Prospective observational cohort study	recruiting	No	-
Small Bowel Deep Learning Algorithm Project	2b	London North West Healthcare NHS Trust	Open label clinical trial	recruiting	No	-
The ADDapt Diet in Reducing Crohn's Disease Inflammation	3	King's College London	RCT	recruiting	No	-
The Feasibility of Following the Crohn's Diet	3	King's College London	clinical trial not further specified	finished	Yes	No
Management of diarrhoea in patients with stable ulcerative colitis: multi-arm multi-stage trial of low FODMAP diet amitriptyline ondansetron or loperamide (MODULATE)	3, 6	NIHR Evaluation Trials and Studies Coordinating Centre (NETSCC)	RCT	unclear	No	-
Understanding Abdominal Pain in IBD and IBS	4	Guy's and St Thomas' NHS Foundation Trust	Crossover RCT	recruiting	No	-

A supported online self-management for symptoms of fatigue, pain and urgency/incontinence in people with inflammatory bowel disease: the IBD-BOOST trial	4, 6, 8	National Institute of Health Research (NIHR) Programme Grant for Applied Research (PGfAR), UK	observational cohort study - not specified	recruiting	No	-
Anorectal Function in Perianal Crohn's Disease	5	The Leeds Teaching Hospitals NHS Trust	Prospective observational cohort study	recruiting	No	-
MR Assessment of Perianal Crohn's Disease (MAP)	5	University of Nottingham	Prospective observational cohort study	Unknown	-	-
CD-TREAT Diet: a Novel Therapy for Active Luminal Crohn's Disease	7	NHS Greater Glasgow and Clyde	Open label clinical trial	recruiting	No	-
Non-invasive Approaches to Identify the Cause of Fatigue in Inflammatory Bowel Disease Patients (IBD Fatigue)	8	University of Nottingham	Open label clinical trial	recruiting	No	-
Cognitive-behavioural therapy for the management of inflammatory bowel disease-fatigue: a feasibility randomised controlled trial	8	King's College London	RCT	pilot trial finished		Yes (pilot trial 12/2019)
Cost-effectiveness of laparoscopic ileocaecal resection versus infliximab treatment of terminal ileitis in Crohn's disease: the LIRIC Trial.	9	The Amsterdam Medical Centre	RCT	finished	Yes	Yes
STOP-Colitis pilot trial protocol: a prospective, open-label, randomised pilot study to assess two possible routes of faecal microbiota transplant delivery in patients with ulcerative colitis.	10	National Institute for Health Research (UK)	RCT	recruiting	Yes (pilot trial)	Yes (pilot trial)

Supplementary Table 1: overview of non-pharmaceutical-driven clinical IBD studies in adults in the UK since 09/08/2016

Study Title	Priority	Sponsor	Study Type	Status
Exploratory Trial to Assess Mechanism of Action, Clinical Effect, Safety and Tolerability of 12 Weeks of Treatment With BI 655130 in Patients With Active Ulcerative Colitis (UC)	1	Boehringer Ingelheim	Open label clinical trial	finished
GSK2982772 Study in Subjects With Ulcerative Colitis	1	GlaxoSmithKline	RCT	finished
Vedolizumab IV 300 mg in the Treatment of Fistulizing Crohn's Disease (ENTERPRISE)	5	Takeda	RCT	finished
A Phase 2a, Randomised, Double-Blind, Placebo-Controlled Study to Evaluate the Safety/Tolerability and Efficacy of TOP1288 200 mg Rectal Solution Once Daily for 4 Weeks in Symptomatic Ulcerative Colitis Patients with Moderate to Severe Disease Activity	1	Topivert Pharma Ltd	RCT	finished
Study for Safety and Tolerability of TOP1288 Administered Orally in Healthy Subjects	1	Topivert Pharma Ltd	RCT	finished
Open-label V565 Target Engagement Study	1	VHsquared Ltd.	Open label clinical trial	finished

Supplementary Table 2: overview of completed pharmaceutical-driven clinical IBD studies in adults in the UK since 09/08/2016
