Table S1. PRISMA-S checklist

Section/topic	#	Checklist item	Location(s) reported
INFORMATION SOURCES AND METHODS			
Database name	1	Name each individual database searched, stating the platform for each.	OID MEDLINE/PubMed, Elsevier Scopus, EMBASE, Web of Science, Google Scholar
Multi-database searching	2	If databases were searched simultaneously on a single platform, state the name of the platform, listing all of the databases searched.	University of Toronto Library
Study registries	3	List any study registries searched.	clinicaltrials.gov/ who.int/clinical-trials-registry-platform/the-ictrp-search-portal cochranelibrary.com/central
Online resources and browsing	4	Describe any online or print source purposefully searched or browsed (e.g., tables of contents, print conference proceedings, websites), and how this was done.	IADR.org orca-caries-research.org/
Citation searching	5	Indicate whether cited references or citing references were examined, and describe any methods used for locating cited/citing references (e.g., browsing reference lists, using a citation index, setting up email alerts for references citing included studies).	Titles were browsed in all databases. The citations in the reference lists of the full papers retrieved and read were browsed for citations missed in the literature search.
Contacts	6	Indicate whether additional studies or data were sought by contacting authors, experts, manufacturers, or others.	Experts in the dental profession in Canada were contacted about hydroxyapatite in oral care products.
Other methods	7	Describe any additional information sources or search methods used.	Contact with the dental profession in Germany revealed more foreign language studies.
SEARCH STRATEGIES			
Full search strategies	8	Include the search strategies for each database and information source, copied and pasted exactly as run.	See supplemental table S2
Limits and restrictions	9	Specify that no limits were used, or describe any limits or restrictions applied to a search (e.g., date or time period, language, study design) and provide justification for their use.	The final date of the search was March 15, 2021. All languages were accepted. All open access papers were accepted.
Search filters	10	Indicate whether published search filters were used (as originally designed or modified), and if so, cite the filter(s) used.	No filters were used.
Prior work	11	Indicate when search strategies from other literature reviews were adapted or reused for a substantive part or all of the search, citing the previous review(s).	There were no previous searches used.
Updates	12	Report the methods used to update the search(es) (e.g., rerunning searches, email alerts).	Two authors had a previous list of published papers. These provided 6 of the 30 additional publications found outside of the search.
Dates of searches	13	For each search strategy, provide the date when the last search occurred.	March 15, 2021 (all searches)

Table S1. *continued*

Section/topic	#	Checklist item	Location(s) reported
PEER REVIEW			
Peer review	14	Describe any search peer review process.	Peer review was not done in advance. It will be based on the CJDH manuscript peer-review process.
MANAGING RECORDS			
Total records	15	Document the total number of records identified from each database and other information sources.	See supplemental table S3
Deduplication	16	Describe the processes and any software used to deduplicate records from multiple database searches and other information sources.	Duplicates were found manually and by using keyword searches in PDF printouts of lists of papers generated in the searches.
