

**Table S1. Multivariate regression analysis for prediction of HPR at LTA and VASP assay.<sup>a</sup>**

Variables	LTA		VASP assay	
	OR (95% CI)	P	OR (95% CI)	P
<b>dual antiplatelet therapy</b>	<b>0.048(0.004, 0.531)</b>	<b>0.013</b>	<b>0.033(0.007, 0.163)</b>	<b>&lt;0.001</b>

<sup>a</sup> Adjusted for previous of percutaneous coronary intervention, previous of stroke, MPV, hsCRP, left ventricular ejection fraction, and aspartate transaminase.

HPR, high on-treatment platelet reactivity; MPV, mean platelet volume.
