

S1 Table: SAFE study sites and patches

SAFE sites and restoration patches within each listed by County. Provided for each patch are the following: Area = size of restoration patch (in ha); Latitude, Longitude = coordinates for geographic location; Code = acronym used to designate samples from each patch. Numbers of samples representing each species are listed as identified based on phenotype (FieldID) or genotype (GenID), with the MIOC = *M. ochrogaster* (prairie vole) and MIOC *M. pennsylvanicus* (the meadow vole). Locations of SAFE sites within Illinois are depicted in Figure 1.

County	SAFE Site	Patch	Area (ha)	Latitude	Longitude	Code	FieldID		GenID	
							MIOC	MIPE	MIOC	MIPE
Livingston	Pontiac	Curve	37.19	41° 4' N	88° 42' E	POCU	10	-	10	-
