

Table S1. Functional traits determined for species shown in phylogenetic tree (see Fig. 1a in the main text). KEGG annotations for the genomes of each species were examined for the genes needed for a functional pathway.

*Used *C. thiooxydans* CNB-1 genome in KEGG database

**Used *C. testosteroni* TK102 for KEGG identifiers and MetaCyc to confirm for *C. testosteroni* KF-1

Species	Glycolytic EMP	Oxidative PP			ED pathway		C4-carboxylate transporters	Carbohydrate transport systems				Glucose utilization
