

Table S3. Physiological characteristics of *P. putida* KT2440, *C. testosteroni* KF-1, and *C. testosteroni* T-2 grown on succinate or gluconate. NF indicates that the metabolites were not quantified in the extracellular medium. Data are expressed as mean \pm the standard deviation of three biological replicates.

*Biomass yield accounted for 2-ketogluconate as a substrate in addition to gluconate.

**Data in parentheses represent consumption rate for 2-ketogluconate.
