

Circulating mtDNA in SLE

Figure S2. Confusion matrix depicting the performance of mtDNA copy number determination as a biomarker for reliable diagnostic assessment of SLE. Values of sensitivity, specificity, accuracy, precision and negative predictive value (NPV) are also included.

		Test-based diagnosis		
		SLE	healthy	
Clinical diagnosis	SLE	90	13	Sensitivity 0.87
	healthy	3	53	Specificity 0.95
		Precision 0.97	NPV 0.80	Accuracy 0.90
