Dear Authors,

One condition from the journal is that I compile a document containing email-based approvals from each author. The only difference between this version and the revision version is the addition of author contribution and data availability statements.

Here is their exact wording:

"Please request agreement from all authors including additions and deletions, these can be collected in the following way:

Email your co-authors with the change, and ask them to reply to your email confirming that they agree to these changes. Once you have collected these replies, please combine all of the co-authors' email responses in one document and upload this file to your submission."

Thank you,

Rob

"Please request agreement from all authors including additions and deletions, these can be collected in the following way:
