

Appendix
Childhood Abuse-Related Weight Gain: An Investigation of Potential Resilience Factors
Mason et al.

Appendix Table 1. Missingness of Potential Modifiers Due to Survey Non-Response and Missingness Among Responders in Analytic Sample^a

Variable	Survey(s)	Total missing due to survey non response, n	Total missing among survey responders, n	Total missing in analytic sample, n
Social status	1999 and/or 2001	264	371	635
Neighborhood safety	1997, 1998, and/or 1999	92	126	218
Adult outside family made participant feel important or special	2007	— ^b	0	0
Relationship with mother	2005	370	23	393
Religious service attendance	1999	578	422	1,000
Prayer/meditation	1999	578	429	1,007
Family structure	1996 (baseline)	— ^c	0	0
Extended family	1996 (baseline)	— ^c	0	0

^aExcludes those who did not respond to the 2007 survey on which abuse was assessed (n=7,020), those who did not respond to the 2013 survey on which BMI was assessed (n=3,058), those missing abuse data (n=473) or BMI data (n=102).

^bAnalytic sample was restricted to those with 2007 responses.

^cAll participants had baseline data.
