Supplementary Table 1. Sensitivity and specificity of iterative thematic analysis and neural network models

	Sensitivity	Specificity
Iterative Thematic Analysis		
Model 1	69.1994573	84.8868923
Model 2	63.7720488	76.7447457
Model 3	61.7367707	75.3008182
Model 4	61.8724559	74.8355527
Model 5	60.1085482	74.4184181
Neural network	70.963365	78.0683459

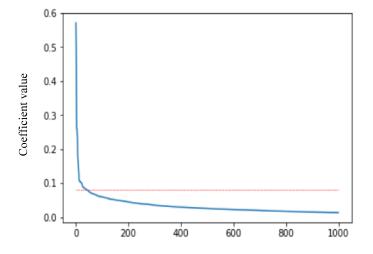

Supplementary Table 2. Themes that emerged in iterative thematic analysis and associated

variables.

Theme	Variables	
Experiences of/	• Experienced any emotional violence	
exposure to	• Experienced physical violence perpetrated by husband/partner	
violence	Respondent afraid of husband/partner most of the time	
	• Respondent ever physically hurt husband/partner when he was not	
	hurting her	
	• Someone hurt respondent during pregnancy	
	• Respondent's father perpetrated IPV	
	• Someone other than husband physically hurt respondent	
Sexual behavior	• Had sex with most recent partner at least a month ago	
	• Times in last 12 months had sex with most recent partner : more than 10	
	times	
	• Age at first sex : 15:17 years	
	• Reason for not having sex recently is not because tired or not in mood	
	• Relationship with most recent sex partner : spouse	
	• Total lifetime number of sex partners: one	
	• Number of sex partners, including spouse, in last 12 months: 1	
	• Time since last sex (in days): less than 30 days	
<b>N</b>	• Number of sex partners, excluding spouse, in last 12 months: 0	
Decision-making	• Getting medical help for self: getting permission to go is big problem	
and freedom of	• Person who usually decides what to do with money husband earns is	
movement	husband/partner alone	
	• Not at all allowed to go to places outside this village	
	• Getting medical help for self: not wanting to go alone is not a big problem	
	• Lived away from home for more than one month in last 12 months	
	• Person who usually decides how to spend respondent's earnings is	
	husband/partner alone	
	• Person who usually decides on visits to family or relatives is respondent	
	alone	
Socio-	• State: Bihar	
demographics	• Wealth index: Poorest	
	Belongs to scheduled caste	
	• Relationship to household head: daughter	
	• State: Haryana	
	• Husband or Partner's education level: had no education	
	• State: Jharkhand	
	• Religion: Hindu	
	• Respondent's mother tongue: Manipuri	
	Husband/Partner's occupation : skilled and unskilled manual	

• Cohabitation duration: 10-14 years• State: Manipur• Highest educational level: Primary• Age: 30-34 years• Respondent's occupation: Services/Household and domesticAccess to media• Frequency of listening to radio : almost every day• Source of information about AIDS is not newspapers/magazines• Believes that tuberculosis is spread by: sexual contactknowledge• Never heard of oral rehydration• Does not know that public: govt. dispensary could be a source of• Believes that tuberculosis is not newspapers/magazines• Source of information about AIDS is not newspapers/magazines•		• Wealth index - rural: poorer
• State: Manipur• Highest educational level: Primary• Age: 30-34 years• Respondent's occupation: Services/Household and domesticAccess to media• Frequency of listening to radio : almost every day• Frequency of watching television : almost every day• Source of information about AIDS is not newspapers/magazinesHealthknowledge• Believes that tuberculosis is spread by: sexual contact• Never heard of oral rehydration• Does not know that public: govt. dispensary could be a source of condoms• Has heard about STIs• Has seen family planning message on a wall painting or hoarding • Source of information about AIDS is not newspapers/magazines• Believes that people can get HIV/AIDS from blood products or blood transfusions• Believes that ways to avoid HIV/AIDS is to limit sex to one partner/stay faithful to one partner• Knows that they can get a condom• Have been told by a health provider about how to deal with side effects of contraception• Getting medical help for self: getting permission to go is big problem • Getting medical help for self: getting money needed for treatment is big problem• Did not go for antenatal care during most recent visit to health center • Transport used by respondent to go to health facility for deliver		1

• Has sought treatment for diabetes		-
• Services/matters talked about in last 3 months with a health provider: not		• Services/matters talked about in last 3 months with a health provider: not
about supplementary food		-
• Has been told by a health provider about how to deal with side effects of		
contraception		
Partner control • Person who usually decides what to do with money husband earns is	Partner control	• Person who usually decides what to do with money husband earns is
husband/partner alone		
• Husband's desire for children: husband wants more children		
• Person who usually decides how to spend respondent's earnings is		• Person who usually decides how to spend respondent's earnings is
husband/partner alone		

Economic	• Has ever taken a loan, cash or in kind, from these programmes, to start or
agency	expand a business
	• Person who usually decides what to do with money husband earns is
	husband/partner alone
	• Getting medical help for self: getting money needed for treatment is a big problem
	• Person who usually decides how to spend respondent's earnings is
Reproductive	husband/partner alone
and maternal	• During pregnancy, had difficulty with daylight vision
	• Had genital discharge in last 12 months
history	• Baby was not immediately wiped dry and wrapped without being bathed after birth
	• Transport used by respondent to go to health facility for delivery:
	tempo/auto/tractor
	• During pregnancy, had convulsions not from fever
	• Number of months pregnant when registered: one
	• Has had a terminated pregnancy
	• Did not want pregnancy when became pregnant but wanted it later
	• Marriage to first birth interval: more than 25 months
Health status	• During pregnancy, had difficulty with daylight vision
	• Had genital discharge in last 12 months
	• During pregnancy, had convulsions not from fever
	• Has sought treatment for diabetes
	• Has had a terminated pregnancy
Substance abuse	Husband/partner drinks alcohol
	• Someone smoked in respondent's home or presence, in last 30 days
Diet	• Never eats fruits
	• Occasionally takes milk or curd
Fertility	Husband's desire for children: husband wants more children
preferences	• Did not want pregnancy when became pregnant but wanted it later
