COREQ (COnsolidated criteria for REporting Qualitative research) Checklist

A checklist of items that should be included in reports of qualitative research. You must report the page number in your manuscript where you consider each of the items listed in this checklist. If you have not included this information, either revise your manuscript accordingly before submitting or note N/A.

Domain 1: Research team and relexivity Personal characteristics Interviewer/facilitator 1 Which author/s conducted the interview or focus group? Credentials 2 What was the researcher's credentials? E.g. PhD, MD Image: Comparison of Comparison on Comparison on the time of the study? Gender 4 Was the researcher male or female? Image: Comparison on Comparison on Comparison on the time of the study? Relationship extabilished 6 Was a relationship extabilished prior to study commencement? Participants Relationship extabilished 6 Was a relationship extabilished prior to study commencement? Image: Comparison on Comparine Comparison on Comparison on Comparison on Compari	Торіс	Item No.	Guide Questions/Description	Reported on Page No.
Personal characteristics Interviewer/facilitator 1 Which author/s conducted the interview or focus group? Interviewer/facilitator 1 Which author/s conducted the interview or focus group? Image: Construction of the study? Image: Construction of the study?<	ain 1: Research team			
Personal characteristics Interviewer/facilitator 1 Which author/s conducted the interview or focus group? Interviewer/facilitator 1 Which author/s conducted the interview or focus group? Interviewer/facilitator	reflexivity			9
Interviewer /facilitator 1 Which author/s conducted the interview or focus group? Credentials 2 What was the the researcher's credentials? E.g. PhD, MD 1 Cocupation 3 What was the inder occupation at the time of the study? 1 Cedentials 7 and the study? 2 Study and the test of the study? 2 Study and the researcher male or female? 2 What was the researcher male or female? 2 Study and the researcher have? 2 Study and the researcher is credentials? E.g. PhD, MD 2 Study Commencement? 2 Study and the interviewer of goals, reasons for doing the research researcher? e.g. personal goals, reasons for doing the research topic Domain 2: Study design 2	onal characteristics			
Cleventials 2 What were the researcher is the density is proceedings in the time of the study? Gender 3 What was their occupation at the time of the study? Gender 4 Was the researcher male or female? Experience and training 5 What was their occupation at the time of the study? Relationship with participants 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research Interviewer goals, reasons for doing the research 7 Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic Domain 2: Study design 9 What methodological orientation was stated to underpin the study? e.g., grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection 9 What was their participants approached? e.g. face-to-face, telephone, mail, email Sampling 10 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? Non-participation 14 Where was the data collected? e.g. home, clinic, workplace Presence of non- 15 Was anyone else present besides the participants an	viewer/facilitator	1	Which author/s conducted the interview or focus group?	9
Occupation 3 What was their occupation at the time of the study? 1 Experience and training 5 What experience or training did the researcher have? 1 Relationship with participants 5 What experience or training did the researcher have? 1 Relationship established 6 Was a relationship established prior to study commencement? 1 Participant knowledge of 7 What did the participants know about the research 1 Relationship with participant knowledge of 7 What did the participants know about the inter viewer/facilitator? 1 Participant knowledge of 7 What characteristics were reported about the inter viewer/facilitator? 1 Interviewer goals, reasons for doing the research 1 1 Methodological orientation 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 1 Participant selection 10 How were participants approached? e.g. face-to-face, telephone, mail, email 1 Sampling 10 How was may participants approached? e.g. face-to-face, telephone, mail, email 1 Sample size <td>entials</td> <td>2</td> <td>What were the researcher's credentials? E.g. PhD, MD</td> <td>9</td>	entials	2	What were the researcher's credentials? E.g. PhD, MD	9
Experience and training 5 What experience or training did the researcher have? Relationship with participants Relationship established 6 Was a relationship established prior to study commencement? Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research Interviewer goals, reasons for doing the research [] Domain 2: Study design ************************************	pation	3	What was their occupation at the time of the study?	9
Relationship with participants Relationship established 6 Was a relationship established prior to study commencement? Relationship established 6 Was a relationship established prior to study commencement? Relationship established 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research Interviewer gaals, reasons for doing the research [] Domain 2: Study design Theoretical framework Methodological orientation and theory, discourse analysis, ethnography, phenomenology, content analysis [] Participant selection 9 What methodological orientation selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants selected? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? [] Non-participation 13 How many people refused to participants and researchers? [] Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace [] Presence of non- 15 Was anyone else present besides the participants and researchers? [] Data collection 14 Where was the data collected? e.g. home, cl	ler	4	Was the researcher male or female?	9
participants Relationship established 6 Was a relationship established prior to study commencement? Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic Domain 2: Study design Theoretical framework Methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants were in the study? Image: Sample size Sample size 12 How many participants were in the study? Image: Sample size Setting Samy else present besides the participants and researchers? Image: Samy else participants Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace Presence of non- 15 Was anyone else present besides the participants and researchers? Data collection 14 What are the important characte	rience and training	5	What experience or training did the researcher have?	
Relationship established 6 Was a relationship established prior to study commencement? Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research Interviewer 8 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic Domain 2: Study design Theoretical framework Methodological orientation 9 What methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection 5 Sampling 10 Method of approach 11 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How many participants were in the study? Non-participation 13 How many people refused to participate or dropped out? Reasons? Setting 5 Was anyone else present besides the participants and researchers? participants 16 What are the important characteristics of the sample? e.g. demographic data, date Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date <td>tionship with</td> <td></td> <td></td> <td></td>	tionship with			
Relationship established 6 Was a relationship established prior to study commencement? Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research Interviewer goals, reasons for doing the research [] Domain 2: Study design	cipants			7
Interviewer goals, reasons for doing the research Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic Domain 2: Study design Theoretical framework Methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection 9 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? Non-participation 13 How many people refused to participate or dropped out? Reasons? Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace Presence of non- participants 16 What are the important characteristics of the sample? e.g. demographic data, date Description of sample 17 Were questions, prompts, guides provided by the authors? Was it pilot tested? Repeat interviews 18 Were repeat inter views carried out? If yes, how many? Audio/visual recording 19 Did the research use audio or visua	ionship established	6	Was a relationship established prior to study commencement?	
Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? Domain 2: Study design	cipant knowledge of	7	What did the participants know about the researcher? e.g. personal	7-8
e.g. Bias, assumptions, reasons and interests in the research topic Domain 2: Study design Theoretical framework Methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection 9 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? 10 Non-participation 13 How many people refused to participate or dropped out? Reasons? 10 Setting 9 What are the important characteristics of the sample? e.g. demographic data, date 11 Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date 11 Participants 11 Were questions, prompts, guides provided by the authors? Was it pilot tested? 12 Setting 16 What are the important characteristics of the sample? e.g. demographic data, date 14 Description of sample 16 What are the important characteristics of the sample? e.g. demographic tested? 12 Defat	nterviewer		goals, reasons for doing the research	
Domain 2: Study design Theoretical framework Methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? Non-participation 13 How many people refused to participate or dropped out? Reasons? Setting 9 What are the important characteristics of the sample? e.g. demographic data, date Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date Data collection 17 Were questions, prompts, guides provided by the authors? Was it pilot tested? Repeat interviews 18 Were repeat inter views carried out? If yes, how many? Audio/visual recording 19 Did the research use audio or visual recording to collect the data? Field notes 20 Were field notes made during and/or after the inter view or focus group? Duration 21 What was the durati	viewer characteristics	8	What characteristics were reported about the inter viewer/facilitator?	7
Theoretical framework Methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? Non-participation 13 How many people refused to participate or dropped out? Reasons? Setting 5 Setting 9 Presence of non- participants 15 Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date Data collection 17 Were questions, prompts, guides provided by the authors? Was it pilot tested? Repeat interviews 18 Were repeat inter views carried out? If yes, how many? Audio/visual recording 19 Did the research use audio or visual recording to collect the data? Field notes 20 Were field notes made during and/or after the inter view or focus group? Duration 21 What was the duration of the int			e.g. Bias, assumptions, reasons and interests in the research topic	
Methodological orientation and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? Non-participation 13 How many people refused to participants or dropped out? Reasons? Setting 14 Where was the data collected? e.g. home, clinic, workplace Presence of non-participants 15 Was anyone else present besides the participants and researchers? participants 16 What are the important characteristics of the sample? e.g. demographic data, date Data collection 17 Were questions, prompts, guides provided by the authors? Was it pilot tested? Repeat interviews 18 Were repeat inter views carried out? If yes, how many? Audio/visual recording 19 Did the research use audio or visual recording to collect the data? 		correction?		
Domain 3: analysis and			10	
findings			10	
Data analysis			12.14	
Number of data coders	24	How many data coders coded the data?	13-14,	Table 3-
Description of the coding	25	Did authors provide a description of the coding tree?	10, 13	
tree			10	
Derivation of themes	26	Were themes identified in advance or derived from the data?	NA	
Software	27	What software, if applicable, was used to manage the data?		
Participant checking	28	Did participants provide feedback on the findings?		
Reporting			Table 3	-5
Quotations presented	29	Were participant quotations presented to illustrate the themes/findings?		
		Was each quotation identified? e.g. participant number	16	
Data and findings consistent	30	Was there consistency between the data presented and the findings?	13-14	
Clarity of major themes	31	Were major themes clearly presented in the findings?	NA	
Clarity of minor themes	32	Is there a description of diverse cases or discussion of minor themes?		

Developed from: Tong A, Sainsbury P, Craig J. Consolidated criteria for reporting qualitative research (COREQ): a 32-item checklist for interviews and focus groups. *International Journal for Quality in Health Care*. 2007. Volume 19, Number 6: pp. 349 – 357

Once you have completed this checklist, please save a copy and upload it as part of your submission. DO NOT include this checklist as part of the main manuscript document. It must be uploaded as a separate file.
