

Supplementary Figure 1. Detection of phenotypic characteristics of platelet-CD4⁺ T cell aggregates. Representative gating strategy for CD62P (A), CD45RO (B), CCR5 (C), CXCR4 (D), HLA-DR/CD38 (E), PD-1 (F), FLICA-caspase-1 (G), Active-caspase-3 (H), and Bcl-2 (I) expression in platelet-CD4⁺ T cell aggregates and their counterparts.
