

Supplementary Table 2. Comparison of anti-Spike IgG, IgM, and IgA positivity at in patients and controls, according to time-point (data presented in Figure 2).

Isotype	<i>p</i> -value*	
	t1	t2
IgG	0.0014	0.2463
IgM	0.5068	0.5068
IgA	0.3088	0.3612

t1 – sera collected 21 days post-1st vaccine dose; t2 – sera collected 42 days post-1st vaccine dose.

*Chi squared test with BH method for *p*-value adjustment used to compare positivity between patients and controls.
