50

51 **Figure 3—source data 2: Kinetic measurement of KSIIs at 25°C with substrate 5(10)-estrene-3,17-dione.**

52 ^a (Engqvist, 2018)

53 ^b Reported assay temperatures are the average of at least three measurements per experiment.

54 ^c average ± standard deviation from 2–9 independent experiments with enzyme concentration varied by at least 5-fold.

55 Values measured with substrate concentrations from 9–600 μM. Value of k_{cat}/K_M are less than 10⁷ M⁻¹ s⁻¹ and thus
56 unlikely to be limited by substrate binding. Reported assay temperatures are the average of at least 3 measurements
57 per experiment.
