

Newly sequenced plastomes

151,780 - 152,920 bp

- [green square] photosystem I
- [green square] photosystem II
- [light green square] cytochrome b/f complex
- [light green square] ATP synthase
- [yellow square] NADH dehydrogenase
- [green square] RubisCO large subunit
- [red square] RNA polymerase
- [brown square] ribosomal proteins (SSU)
- [brown square] ribosomal proteins (LSU)
- [orange square] clpP, matK
- [purple square] other genes
- [yellow square] hypothetical chloroplast reading frames (ycf)
- [dark blue square] transfer RNAs
- [red square] ribosomal RNAs
