

Supplementary Table 1. Accuracy of various operational definitions of GBS in Gangnam Severance Hospital

Operational definition	Sensitivity (%)	Specificity (%)	PPV (%)	NPV (%)
Diagnostic code for GBS only	100	22	35	100
Diagnostic code for GBS + NCS	77	61	46	86
Diagnostic code for GBS + hospitalization	100	86	75	100
Diagnostic code for GBS + specific department*	100	45	44	100
Diagnostic code for GBS + specific department + hospitalization	100	92	85	100

*Specific department: departments of neurology, rehabilitation medicine, or pediatrics.

GBS, Guillain-Barré syndrome; NCS, nerve conduction study; NPV, negative predictive value; PPV, positive predictive value.
