Re: Metabolic Adverse Effects of Off-Label Use of Second-Generation Antipsychotics in the Adult Population: A Systematic Review and Meta-Analysis
NPP-21-0603R

This letter is to confirm that all authors are aware of the changes made to authorship order between revisions and agree with the final order that has been decided on. During the revision process, we were made aware that only two individuals could share first and last authorship. To comply with journal regulations, we had a group discussion to reach a consensus on an author order we would all be comfortable with.

Below are the signatures of all authors attesting to the final authorship order:

Nicolette Stogios	
Emily Smith	
Sylvie Bowden	
Veronica Tran	
Roshanak Asgariroozbehani	
William Brett McIntyre	
Gary Remington	
Dan Siskind	
Sri Mahavir Agarwal	
Margaret Hahn
