Note: Table figures are weighted logistic regression coefficient estimates. All models adjust for age and period patterns. Model A includes only the main effects of education. Model B includes only the main effects of race-sex groups. Model C includes the two main effects and their interactions. Age and period estimates are omitted for ease of presentation and available upon request. <HS: less than high school; HS: high school; SCol: some college; Col: college. \*: p<0.5; \*\*: p<0.1; \*\*\*: p<0.001.
