

Figure S9. Domain organization of SPFH family proteins.

Domain organization of SPFH family proteins, including *E. coli* HflC and HflK, *H. sapiens* prohibitin-1 and -2, *S. cerevisiae* prohibitin-1 and -2, *M. musculus* stomatin, *H. sapiens* erlin-1 and -2, and *M. musculus* flotillin-1 and -2. The domain boundaries were estimated on the basis of secondary structure prediction. Note that flotillin domain is also a predicted coiled-coil.
