

Data Sharing Statement

Levy. Effect of Moderate Hypothermia vs Normothermia on 30-Day Mortality in Patients With Cardiogenic Shock Receiving Venoarterial Extracorporeal Membrane Oxygenation. *JAMA*. Published February 01, 2022. doi:10.1001/jama.2021.24776

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: blevy5463@gmail.com

When available: beginning date: 01-01-2023, end date: 01-01-2029

Supporting Documents

Document types: Statistical/analytic code, Informed consent form

How to access documents: blevy5463@gmail.com

When available: beginning date: 01-01-2023, end date: 01-01-2029

Additional Information

Who can access the data: The deidentified patient data will be accessible after publication of the Article upon request to the corresponding author (Bruno Levy, Nancy University Hospital, blevy5463@gmail.com). The analysis proposal will be evaluated by the steering committee and the sponsor. The adequacy of the proposal with French data protection law will be verified by the sponsor. An access to the data will be granted following this process for data access proposals that meet both scientific requirements (evaluated by the steering committee) and legal requirements (evaluated by the sponsor – possibly with the direct authorization of the Commission Nationale de l'Informatique et des Libertés (CNIL)).

Types of analyses: to be discussed with the steering committee

Mechanisms of data availability: After approval of a proposal

Any additional restrictions: none
