

Table SI. Clinical features of parkinsonian syndromes that are difficult to differentiate from progressive supranuclear palsy.

Clinical feature	PSP	PD	MSA	CBD
Asymmetric movement	-	++	-	+++
Axial rigidity	+++	++	++	++
Limb dystonia	+	+	+	+++
Postural instability	+++	++	++	+
Vertical gaze restriction	+++	+	++	++
Frontal behavior	+++	+	+	++
Autonomic dysfunction	-	+	++	-
L-Dopa response early in course	+	+++	+	-
Asymmetrical cortical atrophy	-	-	-	++

CBD, corticobasal degeneration; MSA, multiple system atrophy; PD, Parkinson's disease; PSP, progressive supranuclear palsy; -, negative; +, weak; ++, moderate; + + +, strong positive.
