

SUPPLEMENTAL MATERIAL

Table of Contents

- **Supplemental Table 1, Page 1 (legend) and attached Microsoft Excel spreadsheet.** List of LRT-EV proteins detected by our proteomic analysis.
- **Supplemental Figure 1, Page 1.** LRT-EV isolation methodology.

Supplemental Table 1. List of LRT-EV proteins detected by our proteomic analysis. This table is attached as a Microsoft Excel spreadsheet. Columns respectively indicate (left to right): UniProt/Swiss-Prot Accession/GenPept, protein symbol, Entrez Gene Name, cellular location, type(s), number of peptides, number of scans, and basic protein description.

Supplemental Figure 1. LRT-EV isolation methodology. LRT-EVs were isolated from rat urine through filtration and a series of centrifugation steps. Microscopy images illustrate the supernatant/pellet for various steps.
