

Supplementary Table 1. Multivariate Cox proportional hazards models for incident chronic kidney disease

Model	
Cox models	
Model 1	Adjusted for age, sex, educational attainment, and income level
Model 2	Model 1 + smoking status, BMI, and history of DM and dyslipidemia
Model 3	Model 2 + eGFR, total cholesterol, albumin, and hemoglobin
Time-updated Cox models	
Model 1	Adjusted for sex, educational attainment, income level, and time-updated age
Model 2	Model 1 + smoking status, history of DM and dyslipidemia, and time-updated BMI
Model 3	Model 2 + baseline eGFR and albumin and time-updated total cholesterol and hemoglobin

BMI, body mass index; DBP, diastolic blood pressure; DM, diabetes mellitus; eGFR, estimated glomerular filtration rate.
