

Title

Figure 1. *Slc5a8* (A) and *Slc12a2* (B) genes expression in thymocytes of both gender gonad-intact and gonadectomized rats. The relative gene expression in VPA-treated as compared with their control groups. White color represents female rats, black – male rats; thick black line shows the starting point of gene expression; * $p < 0.05$.
