

Supplementary file - Reporting of both programs according to the TIDieR items

TIDieR item number	TIDieR item name	Intervention Group	Control Group
1	Brief name	Web-Based Training Program on SDM and Down Syndrome Prenatal Screening	Web-Based Training Program and Down Syndrome Prenatal Screening
2	Why	This training on shared decision making aims to improve understanding of and knowledge about trisomy 21 screening. It primarily targets health professionals involved in prenatal follow-up of pregnant women and who support them in the decision about whether to take a prenatal screening test for trisomy 21. It is also relevant for anyone interested in shared decision-making, the use of decision support tools or prenatal screening.	This training aims to improve the understanding of issues surrounding the screening for trisomy 21. It is mainly aimed at health professionals who are involved in prenatal follow-up of pregnant women and who support them in the decision about whether to take a prenatal screening test for trisomy 21. It is also relevant for anyone interested in the ethics of prenatal screening.
3	What (materials)	Four modules containing videos, narrative capsules, additional resources (e.g. scientific articles and relevant links), audio of the videos, and a simulation module. To access the training, the learner must have or be issued a Laval University ID.	Four modules containing videos, narrative capsules and additional resources (e.g. scientific articles and relevant links). To access the training, the learner must have or be issued a Laval University ID.
